## Toys and Materials

Toys can be made of and packaged in all sorts of different materials. For example many Victorian dolls were made of paper or porcelain but now they are normally made of plastic. Study the images to the right. Can you draw lines to match the toys with the materials they are made of?

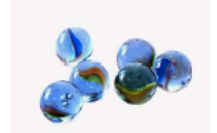

plastic

fabric

wood

metal

paper

musical

electronic

heavy

stretchy

## Toys and Material Properties

Study the images to the left. Can you draw lines to match the toys with the adjectives on the left that best describe their material properties?

## Design Your Own Toy!

We have a lot of different toys in our Time Tunnel, from a Victorian copper toy kitchen set to the popular 80s puzzle, the Rubix Cube. But if you could design your own toy what would it look like? What materials would it be made of and what sort of packaging would it use?

1. Draw your toy!

2. What materials is your toy made of? Label the parts!

Is it...

Plastic?

Fabric?

Shiny?

# MUSEUM *of* BRANDS

3. Have you seen a toy similar to yours? Draw it out.

4. Think of a catch phrase or slogan for your toy.
